

Printing problems in virtualized environments are common, painful and time consuming. Printing should just work, but it often does not. Enter ScrewDrivers®.

SAY GOODBYE TO PRINT DRIVER MANAGEMENT

As the name suggests ScrewDrivers eliminates the need for print drivers. You can forget about the hassle and aggravation of managing redirected printers in Citrix, VMware, and Microsoft RDS environments. It is a desktop print management solution that virtualizes print drivers from remote user workstations.

ROI THROUGH COST/TIME SAVINGS

Generate quick ROI by giving time back to IT departments. By eliminating end user frustration with nonexistent or slow print jobs, ScrewDrivers leads to lower support costs by decreasing help desk calls and tickets. IT staff can now focus on strategic outcomes, rather than waste time fixing low-level support calls.

ENGINEERED FOR YOUR EXISTING ENVIRONMENT

ScrewDrivers provides a printing platform for Citrix, VMware, Microsoft RDS and hybrid environments. Clients simply connect over HDX/ICA, PCoIP, or RDP virtual channels and ScrewDrivers automatically builds all local printers on the hosted application or desktop.

PLUG 'N' PLAY SOLUTION

With simple configuration and management, it's easy to provide users with seamless remote desktop printing - from any application to any printer using any printer setting. No more crashes, no more redundant support calls. Install this simple plug 'n' play solution and forget that printer problems ever existed!

YOU'RE IN GOOD COMPANY WITH TRICERAT

We help customers in all industries, of all sizes embrace and extend their enterprise print and scanning capabilities. Some of the companies we've helped include:

SFUSD SAN FRANCISCO PUBLIC SCHOOLS

KAISER PERMANENTE®

CLUB WYNDHAM®

KEY BENEFITS

- Improves operating system stability
- Access all advanced print features without additional configuration:
 - » PIN/Secure print
 - » Stapling
 - » Collating
 - » Duplex
- Increases print speed by advanced compression and streaming
- Reduces print support costs and efforts
- Eliminates spooler crashes
- Boosts user productivity with seamless printing
- Prints to any available local client printer without admin intervention

FEATURES

- Compatible with:
 - » HDX/ICA
 - » PCoIP
 - » RDP protocols
 - » 32- and 64- bit
- 'Driver-less' technology
- Automatic client updates
